INCLUDES

Steel construction - powder coated

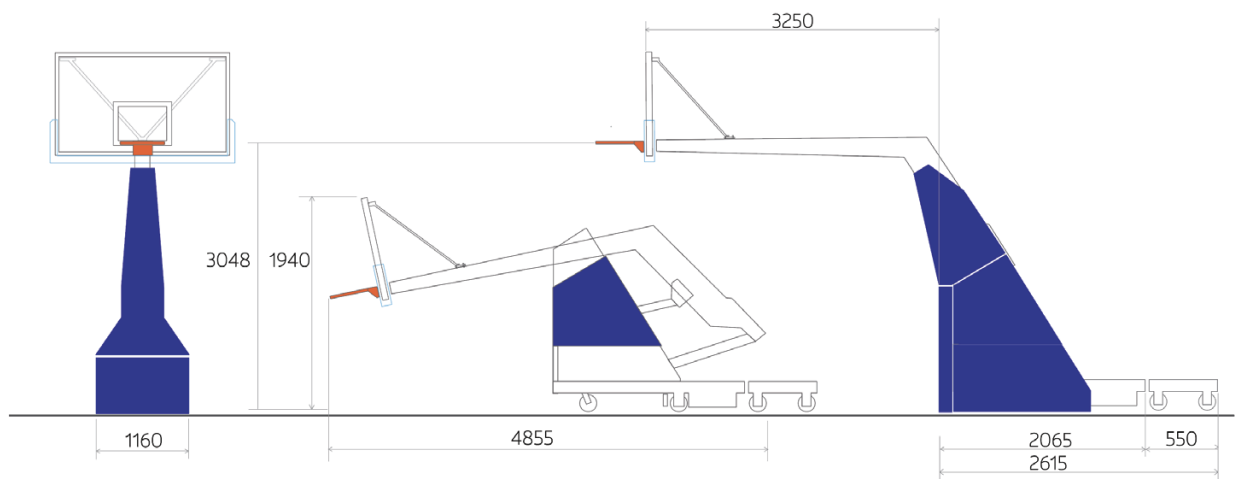

Glass board model 197 - dimensions 180 x 105 cm, made of tempered glass, sheet thickness 10 mm, sheet embedded in an extruded aluminum frame, lines fired in the glass. In the place of contact between the plate and the rim, the glass is cut, which means that the rim does not touch the glass pane, and the forces are transferred to the steel structure of the set. Three points for mounting the board

Model 298 net rim - certified by the Polish Institute of Sport, meets all FIBA requirements, "positive lock" system - a latch that holds the rim in the locked position for a load of 80 kg. Secure mesh attachment eliminating the possibility of hand (finger) damage
